

## EziSync

### Synchronise your data with this powerful solution.

Easily automate complex data synchronisation or Electronic Data Integration (EDI) tasks at the push of a button or on a schedule.

With EziSync, you are able to import from and export to Microsoft SQL Server databases, XML documents, Microsoft Excel workbooks, CSV files, and Outlook contacts. You are also able to automatically retrieve and send data from and to FTP sites, email attachments, SQL Servers, and your network.

Perform complex data manipulation tasks, SQL database backups and create recurring schedules or run on demand simply, with EziSync.

This product is designed for business that require a unique solution to their synchronisation needs.

### Benefits

- Accessible - can be used on any web interface to be accessible remotely.
- Easy to use - EziSync is a simple platform that is easy to use with little, to no training required.
- Flexibility - run how and when you want, and export or import from almost anywhere.
- Schedule options - select from scheduling your synchronisation or complete the task at the push of a button whenever you need to.
- Usability - perform complex data manipulation tasks, SQL database backups and create recurring schedules or run on demand.
