

## Job Invoice Batch Engine (JIBE)

Customise and manage your invoices faster with this solution.

JIBE has been designed to customise and manage your invoices faster, and it is recommended for businesses that create a large number of jobbing invoices on a regular basis.

Simply choose the jobs that you wish to invoice through a selection of criteria, then JIBE will summarise these invoices into a screen which allows you to manage the invoices that will be created. Once verified, JIBE will then create your debtor invoices - easy as that.

### Features

- Create a large number of invoices simultaneously
- Create recurring transactions and launch clarity forms or reports from JIBE
- Ability to customise how data appears on screen, with advanced grid controls
- Change job invoice amount, or create and manage job based price policies

### Benefits

- Bulk Invoice - create job invoices in bulk, reducing costs and admin time.
- Backup - a backup database is run before Batch invoicing is run.
- Customise - use advanced grid controls and filters to customise how data appears on screen; add, remove and drag grid columns; and you are able to edit the quantity, unit cost, unit sell price and narration fields with spellcheck.
- Simple status updates - set the line status of whole jobs or individual lines, change line statuses between In Progress, Ready to Invoice or Written Off, and change the Job Status on Invoice completion.

### Pricing

- \$1295.00+GST per MYOB EXO database.
- 24% annual license fee based on current retail price.

The screenshots illustrate the software's interface for managing job invoices. The top window displays a list of jobs with columns for Job, Status, Client, File, Quoted, Invoiced, Ready to Invoice, Work in Progress, and Total. A context menu is open over the grid. The middle window shows the 'Exosoft Job Invoice Batch Engine' dialog box with 'Job Selection Settings' and 'Job Line Status' sections. The bottom window shows a 'DOROTHY HEDGES' job summary screen with a table of services and a 'Clarity Reports' context menu.
