Client	CASH SALES
Job No	 23
Job Date	28/05/2024 12:40 PM
Job Title	FIXED QUOTE JOB
Job Description	<p>This job is invoiced exactly as per the quotation issued to the customer, even though more labour was expended.</p> <p>The Invoice was generated directly from the quotation, using the option to create a progress invoice, the oil was specifically ordered via purchase orders, the cost had recently gone up. Time was entered off time sheets and it took less time than estimated / quoted to the customer. When the job was complete the invoice was generated for the customer. The actual lines on the job were then back costed against the lines on the invoice by allocating the actuals to this invoice appearing on the billing schedule. It follows a very similar process to Progress Billing with invoicing. If any additional costs had occurred (in this case a transmission fluid top up at no charge to the customer, that had not been quoted for) these could have been allocated against the invoice, or could have been written off as a cost.</p>
